

MAINTENANCE AND CLEANING GUIDE

OUTDOOR WALLS

- 🌿 Outdoor Vistafolia® Green Walls require occasional hosing to keep the plants free of dust and dirt.
- 🌿 Frequency of cleaning will depend on location, areas of high traffic should be cleaned regularly.
- 🌿 Do not use any chemicals / detergents.

INDOOR WALLS

- 🌿 Indoor Vistafolia® Green Walls require occasional, gentle cleaning with a microfibre brush to keep the panels free from dust and dirt.
- 🌿 Frequency of cleaning will depend on location. Water can be used to clean the foliage using a light spray and then allowed to dry naturally without wiping the surface with a cloth.
- 🌿 Do not use chemicals / detergents.

Notes

- Do not use excessive force. This may cause damage to plants.
- Do not jet wash / Do not vacuum.
- Occasionally foliage may come loose from the panels. This is to be expected. **Larger plants can be re-attached to the frame with cable ties.**
- Ladders or mobile towers should not be placed directly on the foliage or green wall as this could damage some of the delicate foliage when cleaning.

All our products come with a 5-year US Limited Liability Warranty
